

RAHUL ACHARI

(+91) 8639996301 | rahulyc18@gmail.com | [linkedin.com/in/rahulyc](https://www.linkedin.com/in/rahulyc) | github.com/rahulachari | Chittoor, AP

CAREER SUMMARY

Final-year Computer Science Engineering student with hands-on experience building AI-integrated web applications. Passionate about shipping practical, end-to-end software — from ML model to deployed product. Strong foundation in Python, Django, Flask, and data-driven development. Actively exploring AI/ML applications in real-world problem domains.

EDUCATION

B.Tech – Computer Science Engineering

The Apollo University, Chittoor, AP

Expected April 2026

CGPA: 8.10 / 10

PROJECT EXPERIENCE

PropCast – AI Real Estate Sales Forecasting Platform

GitHub: <https://github.com/rahulachari/PropCast>

Role: Full Stack Developer

- Built an end-to-end AI forecasting platform using Django, Pandas, Plotly, and Scikit-learn on real Hyderabad property data.
- Implemented a Random Forest ML price predictor with interactive Plotly dashboards for data visualization.
- Integrated Groq LLaMA API to power an AI chat layer that explains market data in plain English.
- Designed CSV upload pipeline with automated statistical summaries and AI-generated market insights.

BeAT Sync – Multi-Device Audio Sync Web App

GitHub: <https://github.com/rahulachari/Beat-sync->

Role: Backend & Application Developer

- Developed a Flask backend enabling real-time synchronized MP3 playback across multiple devices.
- Implemented precise timestamp-based sync logic for low-latency performance.
- Designed a responsive UI for song browsing, media controls, and smooth navigation.

Control-D – AI-Driven Digital Health Assistant

GitHub: <https://github.com/rahulachari/Control-D>

Role: Full Stack Developer

- Built with React, TypeScript, Tailwind CSS, and Supabase for a modern, responsive frontend.
- Developed personalized meal plans, workout routines, and daily reminder modules for diabetes management.
- Implemented adaptive logic based on user health parameters and activity profiles.

TECHNICAL SKILLS

- Programming Languages:** Python, JavaScript, TypeScript
- Web Technologies:** HTML, CSS, React, Tailwind CSS
- Frameworks:** Django, Flask
- ML / Data:** Scikit-learn, Pandas, Plotly, Random Forest
- AI Integration:** Groq LLaMA API
- Database:** SQLite, Supabase
- Tools:** Git, GitHub, VS Code
- Areas of Interest:** Artificial Intelligence, Machine Learning, Data Analytics
- Soft Skills:** Leadership, Communication, Team Collaboration

CERTIFICATIONS

- NPTEL – Introduction to Machine Learning

EXTRACURRICULAR ACTIVITIES

- Member, The Apollo Career Catalyst Club.
- Led end-to-end development of PropCast, Beat Sync, and Control-D projects.
